Model View Controller

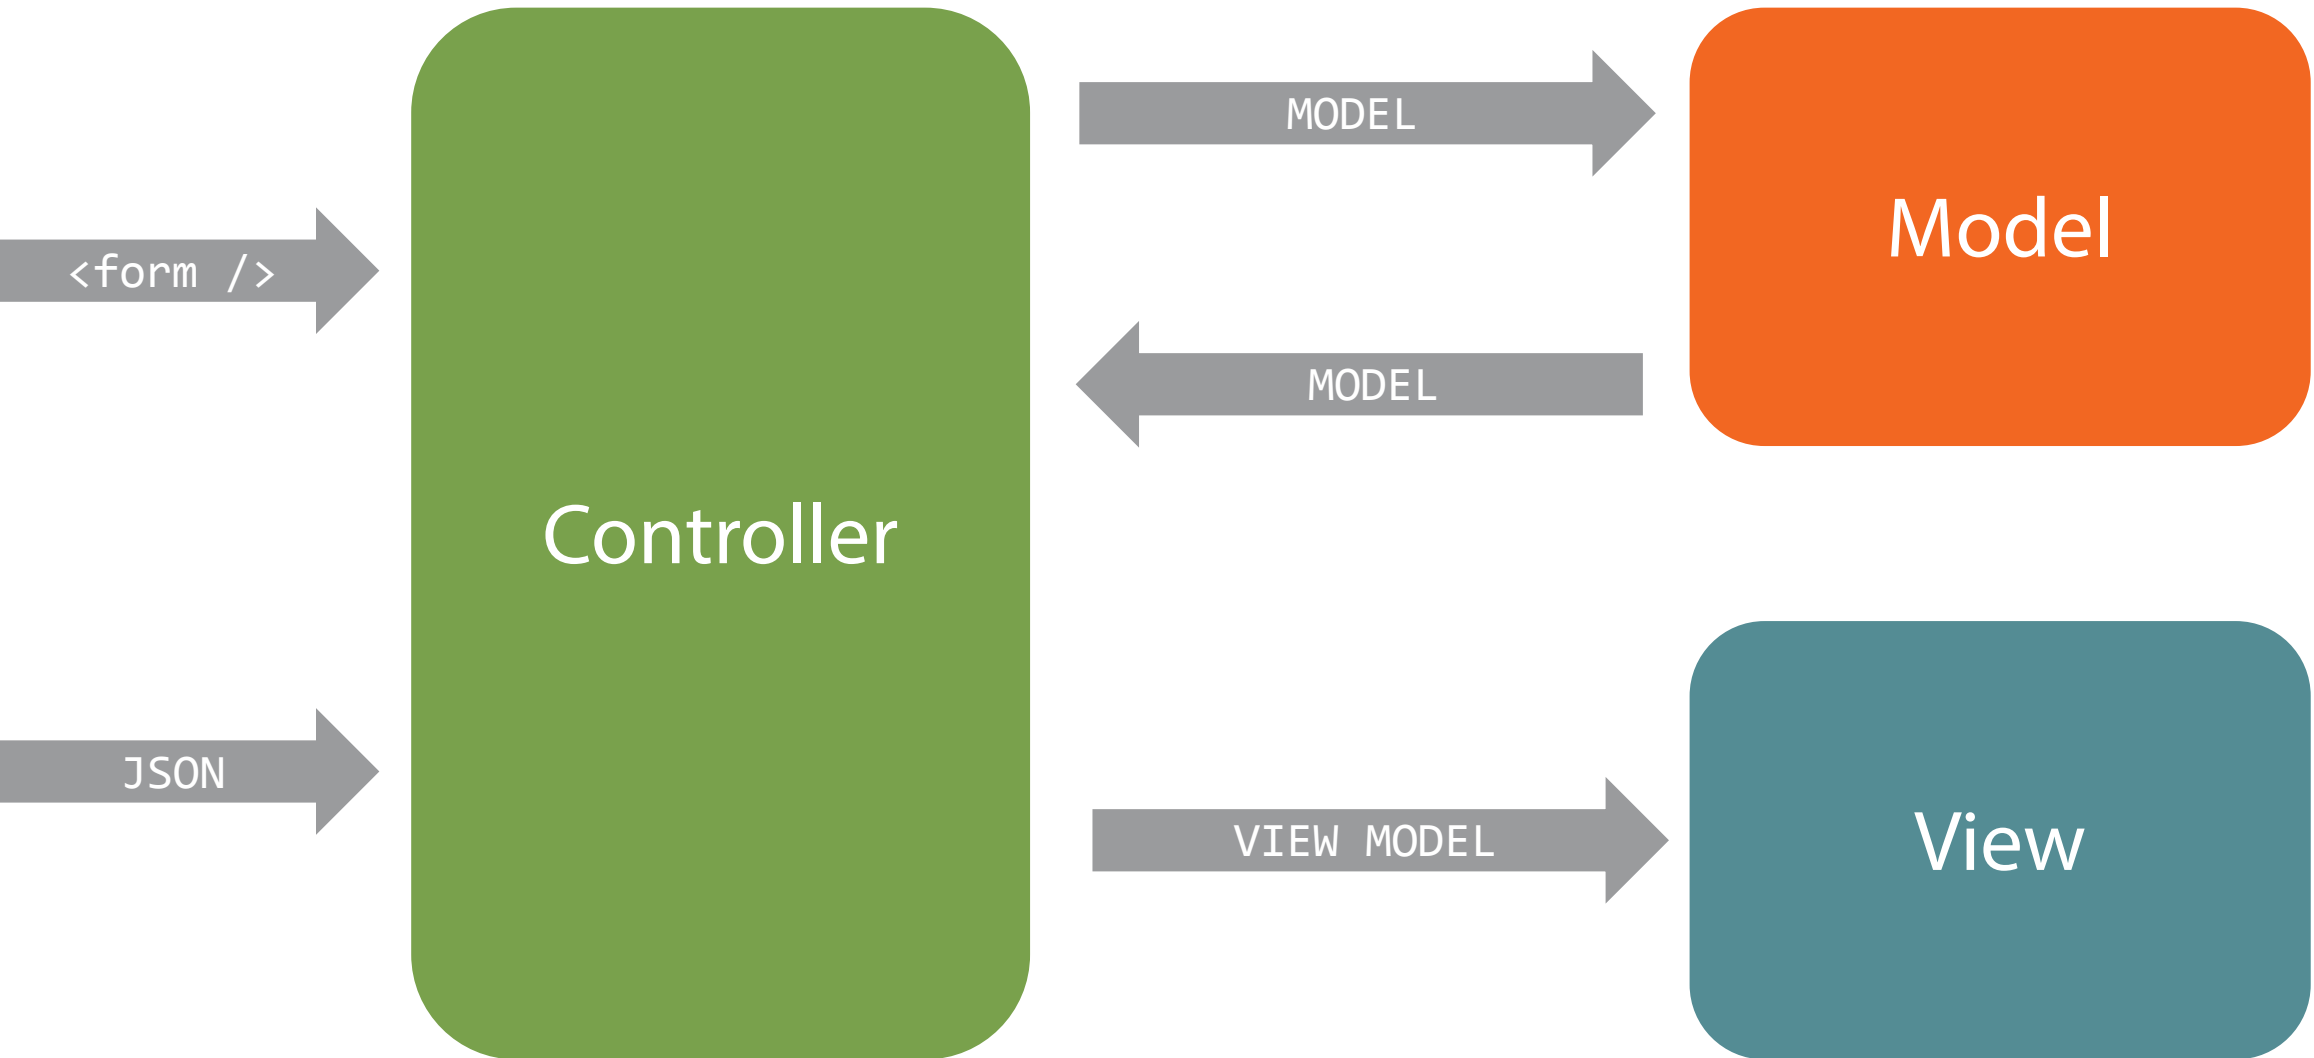

Model Layer

Business Logic

Database
Access

Data Conversion

go test

```
func TestXxxx(t *testing.T) {  
    result := calculateSomething()  
  
    if result != what_I_Expected {  
        t.Fail()  
    }  
}
```

Summary

- Business Logic
- Data Conversion
- Unit Testing
